fotoflōt

fotoflōt

We provide products and solutions for virtually all your image display needs, from miniatures to wall coverings.

We offer three customizable product lines:

fotoflōt pro

Ideal for commercial and institutional applications. Up to 4 ft x 10 ft.

fotoflōt classic

No-glare glassless display with a magnetic mounting system. Up to 40" x 40".

fotoflōt mini

Miniatures for personal spaces, ideal for gifts.

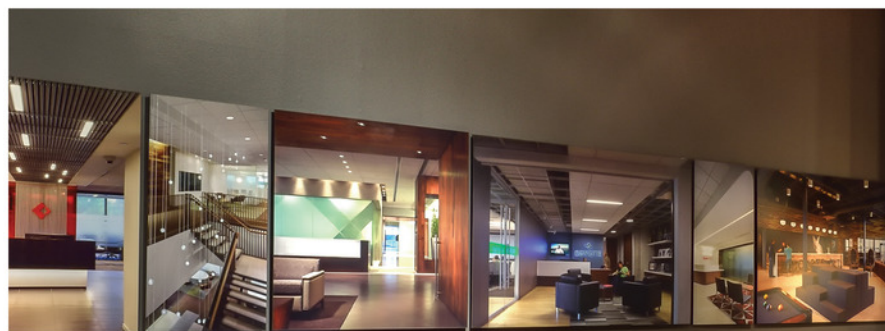

We handle your complex projects with rapid turnaround, custom sizes and shapes, flexible mounting systems, custom-tailored packaging and world-wide shipping.

Partners by Design provides both architectural and interior design services, and is one of the largest stand-alone interior design firms. It serves businesses with multiple locations nationwide through their Chicago-based team and through a network of affiliated firms.

To illustrate their capabilities, they selected fotoflōt to display images of recent projects in their office entrance. The design enables visitors to experience a beautiful visual portfolio of their work in a compact space

AFTER

CHRISTOPHER POGUE, HOME OWNER

IN THE WORDS OF CHRISTOPHER POGUE:

We painted our entire house, took down all decorations, and went for an ambitious plan to replace them with 40 fotoflöt pictures. The result looks amazing.

The fotoflöt team was very helpful getting us organized with so many pictures. This project has completely changed the experience of being in our house.

BEFORE

SCHENKELSHULTZ

ARCHITECTURE

SchenkelShultz Architecture recently renovated their Orlando Florida office. They decided on an installation that would put their story on the wall and illustrate their projects.

We worked with them to create a 32-foot wide installation, constructed with 58 square fotoflöt panels. The panels use our quick-connect mounting hardware, making it easy to update the installation with new projects.

BEFORE

AFTER

HARVARD BUSINESS SCHOOL

Harvard Business School needed a unique gift for a global capital campaign and was intrigued with our fotoflōt classic product. However the campaign required smaller pieces in custom gift boxes.

Derived from our standard product, we designed an innovative 4" x 6" mini-flōt desk stand and a 2" x 3" mini-flōt that attaches magnetically to metal surfaces. For increased impact we also custom-designed gift boxes matching Harvard color standards.

We managed the entire project, and six weeks after the initial contact had designed, produced, packed and shipped 14,000 units to HBS.

fotoflōt classic

fotoflōt classic is a glassless mounting system that eliminates reflections and glare, providing an intimate viewing experience. The magnetic mounting system enables quick change of images.

- PRODUCT SIZES** Sizes range from 10" x 7.5" to 40" x 40", with custom sizes and shapes possible. Wall mount and desk stand versions are available.
- PRINT** Traditional silver halide Lambda print on Fuji Crystal Archive Professional C Type paper.
- CONSTRUCTION** The print is adhered to 1/8" charcoal gray acrylic backing (archival). Products are cut to size and shape with a laser. The laser fuses the paper to the acrylic edge for a bond that never frays.
- MOUNTING** Magnets embedded on the back of the acrylic panel snap into place on a wall bracket or desk stand, floating the image off wall or desk.

fotoflōt pro

fotoflōt pro is an ideal image display system for many commercial and institutional applications where size, impressive presence, and durability are important.

- PRODUCT SIZES** Sizes range from 15" x 10" up to 10ft x 4ft. Arbitrary shapes and rounded corners can be provided.
- PRINT** Traditional silver halide Lambda print on Fuji Crystal Archive Professional C Type paper.
- CONSTRUCTION** The print is sandwiched between a layer of acrylic glazing and a Dibond backing.
- ACRYLIC GLAZING** Thickness can be 1/16", 1/8", 1/4" or greater. Matte, glossy and high-impact resistant surfaces are available.
- DIBOND BACKING** Dibond is an aluminum composite material comprised of two thin aluminum sheets with a solid polyethylene core. It is available in 3mm thickness or greater, with a white finish.
- MOUNTING** An extruded aluminum frame on the back of the panel provides a float mount effect. Many mounting options are available, including quick-mount cleat, wire and hook.

fotoflōt mini

fotoflōt mini products are ideal for personal spaces. The elegant simplicity makes them perfect for gifting.

PRODUCT SIZES fotoflōt mini products can be as small as 4"x6" or 2"x3". Custom sizes, shapes, and versions for attachment directly to metal surfaces are also possible.

PRINT Traditional silver halide Lambda print on Fuji Crystal Archive Professional C Type paper.

CONSTRUCTION The print is adhered to 1/8" charcoal gray acrylic backing (archival). Products are cut to size and shape with a laser. The laser fuses the paper to the acrylic edge for a bond that never frays.

MOUNTING Various mounting options are available, including wall mount and a black curved desk stand

PACKAGING fotoflōt mini products can be shipped in a high-quality gift box. Other options are available as well

Why fotoflōt?

We don't just sell printing and mounting services: we provide standard products and complete solutions for your display projects.

Unsurpassed Quality

Stunning viewing experiences require a level of consistent quality not achieved by general purpose printers. Every aspect of our manufacturing process is tightly controlled and every fotoflōt has a serial number.

Products

If your needs are met by our standard products, your fotoflōts ship as soon as two days from time of order.

Customization

Orders can be customized with little or no extra lead-time: rounded corners, custom sizes, non-rectangular shapes, sequenced packaging and staged shipment, drill-o-grams to simplify installations, gift cards, and much more.

Projects

We have a wide range of capabilities and can handle complete projects:

- support for your digital content preparation
- rapid design and prototyping of custom solutions
- printing directly to substrates or on fabric
- unique manufacturing processes
- capacity for very high-volume shipments
- flexible and custom mounting options
